

Umakhan Magomedov

I am 24 years old and have been living in Saudi Arabia for the past two years. I have been programming since I was 15, starting during my school years.

Full-stack developer with over 10 years of experience in building WEB and mobile applications. Specialized in creating scalable solutions for business automation, ranging from applications with thousands of users to internal corporate systems. Passionate about being part of ambitious projects that create tangible value and shape the future. Eager to contribute to the growth of a strong team and achieve great goals.
